Passionate about web development, with strong knowledge in frontend and hands-on experience in mobile development. Currently expanding my backend skills with the goal of becoming a full-stack developer—combining a comprehensive understanding of the development lifecycle with the ability to build scalable, high-impact solutions

Strong frontend knowledge in **TypeScript, JavaScript, HTML5, CSS3, React, Next.js, TailwindCSS** and **Redux**
Familiar with **Angular**, **Vue** and **Astro**
Backend foundations in **C#/.NET**, **TypeScript/Express.js** and **Python/Flask**
SQL database management using **MySQL** and **PostgreSQL**
Basic mobile development experience with **Flutter/Dart**, and advanced skills with **ReactNative**
Intermediate desktop development using the **Qt** framework with **C++** and **Python**

IMPULSA STUDIO | San Isidro, Lima

Frontend Developer Pre-Professional Intern | October, 2023 – September, 2024
My pre-professional internship allowed me to strengthen my frontend development skills through projects using Next.js and React, actively contributing to the development of multiple websites. I gained hands-on experience with TypeScript, HTML5, CSS3, React, Next.js, responsive design, and Microsoft Azure. I also collaborated on backend tasks using C#/.NET and SQL.

Software Engineer Junior | October, 2024 – Currently
Promoted after one year of internship to take on more complex tasks in frontend and mobile development, with standout contributions to projects such as No hay sin suerte and Tucambista. Led significant improvements in Tucambista's mobile application, including React Native version updates, critical migrations (from Observable to Redux Toolkit), and performance optimizations.

EDUCATION

Software Engineering | Universidad Peruana de Ciencias Aplicadas | August, 2020 – July, 2025
Graduated with a Bachelor's in Software Engineering, achieving top-third academic ranking and actively participating in UPC's Academic Excellence Group (GEA)
Python for Everybody Specialization | Coursera – University of Michigan | June, 2023 [Certificate]
Learn SQL Basics for Data Science Specialization | Coursera – University of California, Davis | June, 2024 [Certificate]
Diseño de Bases de Datos Relacionales con MySQL | Mastermind | February, 2023 [Certificate]
Todo sobre la web con PHP | Mastermind | February, 2023 [Certificate]
Introducción a Frameworks de Frontend con Vue 3 | Mastermind | February, 2023 [Certificate]
English: B1 (TOEIC Bridge: 166/180) | WeTalk UPC | November, 2022 [Certificate]
